

Khoa Pham

Senior Front-end Developer

Profile

I am a developer with 5+ years of experience developing web application. My passion is to write clean code and develop good UX. I like working with the front-end since it helps me to deliver direct messages to the end users.

Experience

Senior Front-end Developer, Seastar.io

03/2015 - Present

Lead of front-end development to design and create intuitive web application for Seastar dashboard using EmberJS, D3.js, Golang, Cassandra.

Web Application Engineer, The Program PDX

10/2014 - 03/2015

Take technical ownership of projects and be responsible for architecting and developing complex digital solutions using full-stack technologies like Ruby on Rails, Postgres, Ember, Backbone, NodeJS, ThreeJS, D3.js.

Web Developer, Sincerely Truman (EPIPHEO)

08/2012 - 10/2014

Lead of front-end to develop complex websites and applications. Build highly customized Wordpress themes and Wordpress plugins.

Freelance Web Developer

2011 - 10/2012

Work with local businesses in Portland, Oregon to create their company websites, e-commerce stores and web application.

Labs Technician and Server Operations, Portland State University

06/2010 - 08/2012

Work with server operations team to manage Portland State datacenter. Support staffs and students at PSU for computer software and hardware.

Education
